## L15 Growing Up in Ireland: Child Cohort – Wave 1 Child on Father Questionnaire

<b>Title of overall study</b>	Growing Up in Ireland (GUI): National Longitudinal Study of Children ( <a href="http://www.growingup.ie">www.growingup.ie</a> )
<b>Data creator</b>	Consortium of researchers led by the Economic and Social Research Institute ( <a href="http://www.esri.ie">www.esri.ie</a> ) and Trinity College, Dublin ( <a href="http://www.tcd.ie">www.tcd.ie</a> )
<b>Data funder</b>	Funded by the Department of Children and Youth Affairs ( <a href="http://www.dcy.a.ie">www.dcy.a.ie</a> ), in association with the Department of Social Protection ( <a href="http://www.welfare.ie">www.welfare.ie</a> ) and the Central Statistics Office ( <a href="http://www.cso.ie">www.cso.ie</a> )
<b>Data publisher</b>	Department of Children and Youth Affairs ( <a href="http://www.dcy.a.ie">www.dcy.a.ie</a> )
<b>Brief description</b>	<p><i>Growing Up in Ireland</i> (GUI) is a national longitudinal study of children being conducted with the aim of improving understanding of all aspects of children's lives and their development in the current social, economic and cultural environment. The principal objective of the GUI study is to describe the lives of children in order to establish what is typical and normal, as well as what is atypical and problematic. This information will be used to assist in policy formation and in the provision of services that will ensure all children will have the best possible start in life. The study focuses on a broad range of outcomes. Being longitudinal, it examines developmental trajectories over time, tracking the development of two cohorts: approx. 11,000 infants (9 months old) tracking them into early childhood and approx. 8,500 children (9 years old) tracking them into early adolescence.</p> <p>The <b>Child on Father Questionnaire</b> for the Child Cohort recorded information about the father's encouragement of the child's performance at school, the father-child relationship and parenting style.</p>
<b>Key classificatory variables</b>	ID Other
<b>Themes/domains</b>	Social/Emotional/Behavioural; Relationships
<b>Unit of observation</b>	Study child and father of the Study child
<b>Start date</b>	August 2007 (Wave 1, children at 9 years)
<b>Completion date</b>	September 2011 (Wave 2, same children at 13 years)
<b>Coverage</b>	<p>8,568 children, born between 1st November 1997 and 31st October 1998, were recruited to the Child Cohort for Wave 1 data collection. The following relates to the Child on Father Questionnaire:</p> <ul style="list-style-type: none"> <li>» <b>Target population:</b> Study child.</li> <li>» <b>Number of completed questionnaires:</b> 7,951 questionnaires completed in respect of 8,568 Study children.</li> </ul>

<b>Method of data collection</b>	The Child on Father Questionnaire was completed in respondent's home on a PAPI (Paper and Pencil Personal Interviewing) basis in the presence of a parent/guardian. Questionnaire was sealed by the respondent, handed to interviewer and returned to the GUI study team unopened. Audio assistance was provided where necessary.
<b>Date of last publication</b>	2012. See: <i>i</i> Nixon, E. (2012) <i>Growing Up in Ireland: How Families Matter for Social and Emotional Outcomes of 9-Year-Old Children. Report 4</i> , Department of Children and Youth Affairs. Dublin: Government Publications.
