Inventory of Data Sources on Children's Lives

L21 Growing Up in Ireland: Child Cohort – Wave 1 Time Use Diary Questionnaire

Title of overall study	Growing Up in Ireland (GUI): National Longitudinal Study of Children (www.growingup.ie)
Data creator	Consortium of researchers led by the Economic and Social Research Institute (www.esri.ie) and Trinity College, Dublin (www.tcd.ie)
Data funder	Funded by the Department of Children and Youth Affairs (www.dcy.a.ie), in association with the Department of Social Protection (www.welfare.ie) and the Central Statistics Office (www.cso.ie)
Data publisher	Department of Children and Youth Affairs (www.dcy.a.ie)
Brief description	<p><i>Growing Up in Ireland</i> (GUI) is a national longitudinal study of children being conducted with the aim of improving understanding of all aspects of children's lives and their development in the current social, economic and cultural environment. The principal objective of the GUI study is to describe the lives of children in order to establish what is typical and normal, as well as what is atypical and problematic. This information will be used to assist in policy formation and in the provision of services that will ensure all children will have the best possible start in life. The study focuses on a broad range of outcomes. Being longitudinal, it examines developmental trajectories over time, tracking the development of two cohorts: approx. 11,000 infants (9 months old) tracking them into early childhood and approx. 8,500 children (9 years old) tracking them into early adolescence.</p> <p>The Time Use Diary Questionnaire for the Child Cohort recorded details of how Study children spend their time. Parents were asked to fill in the questionnaire with the Study child.</p>
Key classificatory variables	ID Other
Themes/domains	Social/Emotional/Behavioural; Environment
Unit of observation	Study child
Start date	August 2007 (Wave 1, children at 9 years)
Completion date	September 2011 (Wave 2, same children at 13 years)
Coverage	<p>8,568 children, born between 1st November 1997 and 31st October 1998, were recruited to the Child Cohort for Wave 1 data collection. The following relates to the Time Use Diary Questionnaire:</p> <ul style="list-style-type: none"> » Target population: Study child. » Number of completed questionnaires: 6,412 questionnaires completed in respect of 8,568 Study children.
Method of data collection	The Time Use Diary Questionnaire was completed in respondent's home and returned to the GUI study team by post.

Date of last publication	<p>2012. See:</p> <p>① Nixon, E. (2012) <i>Growing Up in Ireland: How Families Matter for Social and Emotional Outcomes of 9-Year-Old Children. Report 4</i>, Department of Children and Youth Affairs. Dublin: Government Publications.
